From the table above, it can be concluded that these members have made a statement to commit in writing to participate in RSPO certification. The results of interviews with the nine members revealed that their understanding and commitment to implementing the RSPO P&C for Independent Smallholders was quite good, especially related to the commitment to ensure there is no forced labor practices in plantation operations and stop existing forced labor practices. Perkumpulan Petani Swadaya Bangka Lestari already has a list of workers who work in 208 members as of July 2021, where the list explains their name, place of birth, age, ID, religion and others. From the list, the majority of existing workers come from the surrounding community who live in Bangka Regency. These workers are daily workers who are permanently employed by each member every time they carry out harvesting and plant upkeep activities. The results of interviews with workers who work with members of smallholders with Member Plot ID P0082 which states that there is no forced labor practice carried out by the employer to himself and two other people since the first time he worked until now. The employer has provided many benefits to workers such as providing housing, monthly basic necessities, eating/drinking while working and other benefits.

Based on the explanation above, it can be concluded that Perkumpulan Petani Swadaya Bangka Lestari has a statement of

commitment to participate in RSPO certification, one of which is to ensure that there are no forced labor practices in plantation operations and stop existing forced labor practices.

8	H. M. Syahrani	P00082	11 October 2019
9	Namrul	P00125	04 September 2019

From the table above, it can be concluded that these members have made a statement to commit in writing to participate in RSPO certification. The results of interviews with the nine members revealed that their understanding and commitment to implementing the RSPO P&C for Independent Smallholders was quite good, especially related to the commitment to compliance to pay minimum wages to workers. This is evidenced by the member's statement stating that the wages given to their workers are above the minimum wage for Bangka Regency in 2021. It is explained that the daily wage for upkeep workers in a day (7 hours of work) is IDR 150,000/day and for harvest workers they are given piece rates. IDR 150,000/ton FFB (average working day for 6-7 hours) with an average daily yield of 8 tons FFB with 3 workers (averaging IDR 200,000/day). The minimum wage for Bangka Regency in 2021 is IDR 3,232,000/month (IDR 129,280/day), based on the previous statement it can be proven that smallholder members have paid higher wages than the minimum wage set (upkeep IDR 150,000/day and harvesting IDR 200,000 /day). The Perkumpulan Petani Swadaya Bangka Lestari has disseminated the minimum wage to all members (208 people) on 02-07 September 2020.

Based on the explanation above, it can be concluded that Perkumpulan Petani Swadaya Bangka Lestari has a statement of commitment to participate in RSPO certification, one of which is to paying the minimum wage to workers and smallholder members at the time of the interview can explain their commitment/explanation related to this matter.

From the table above, it can be concluded that these members have made a statement to commit in writing to participate in RSPO certification. The results of interviews with the nine members revealed that their understanding and commitment to implementing the RSPO P&C for Independent Smallholders was quite good, especially related to the commitment to compliance to provide opportunities and respect for employees to submit existing complaints/complaints. In addition, the results of the interview with the Group Manager revealed that the Independent Smallholders Association of Bangka Lestari has a Complaints Procedure (Document No. PSBL-ISH-SOP01-01 dated 28 August 2020) in which the procedure explains that members and workers can submit complaints to the management by providing letters to the management at the office, via email, and submit complaints directly to the Group Manager. The management has also informed members and workers if they can report it directly to the RSPO (<https://rspo.secure.force.com/complaintform>). In relation to this procedure, the management has directly provided socialization to all members along with their work from December 04, 2020 to January 25, 2021.

Based on the explanation above, it can be concluded that Perkumpulan Petani Swadaya Bangka Lestari has a statement of commitment to participate in RSPO certification, one of which is to respect the rights of workers to submit complaints/complaints and smallholder members during interviews can explain their commitments/explanations related to this matter.

The results of interviews with the nine members revealed that their understanding and commitment to implementing the RSPO P&C for Independent Smallholders was quite good, especially related to the commitment to provide facilities and safe working conditions to workers. This is evidenced by the results of interviews with members who stated that workers have been facilitated by PPE at work such as providing boots, masks, gloves and aprons to carry out pesticide application activities. In addition, the workers have been given an understanding related to safe conditions at work such as providing socialization related to safe harvesting techniques. This has been socialized to the members along with their work on November 10, 2020.

From the table above, it can be concluded that these members have made a statement to commit in writing to participate in RSPO certification. The results of interviews with the nine members revealed that their understanding and commitment to implementing the RSPO P&C for Independent Smallholders was quite good, especially related to protect HCV and HCS through a precautionary practice approach. This is evidenced by the results of interviews with Group Managers who stated their willingness to protect HCV and HCS and socialized them to all existing members. This is in line with the results of interviews with members who stated that they had a general understanding of HCV/HCS and were committed to protecting them, where the member mentioned that one example is protecting river border areas if there is a plantation area around the river or the presence of tomb and Teu Pek Kong (small house of worship). In addition, there is also Policy 3 on HCV and HCS made by the Perkumpulan Petani Swadaya Bangka Lestari, in which there are 3 main points, namely:

- Areas included in HCV or HCS will be identified based on mapping, interviews and secondary data as conservation areas and preserved by the Perkumpulan Petani Swadaya Bangka Lestari.
- Members of the Perkumpulan Petani Swadaya Bangka Lestari are not allowed to clear land in areas identified as having HCV.
- Members of the Perkumpulan Petani Swadaya Bangka Lestari are not allowed to clear land in areas with high forest density or HCS.

The above policy has been socialized to all members on 02-07 September 2020. In addition, an HCV assessment has been carried out in the Perkumpulan Petani Swadaya Bangka Lestari area from 1 to 15 December 2020 in the Perkumpulan Petani Swadaya Bangka Lestari area located in several villages in Indonesia. Bangka and West Bangka Regencies, Bangka Belitung Province. The scope for the HCV assessment is 1,269.58 hectares with 208 smallholders and overall is land that has been planted with oil palm and has never been certified (existing uncertified plantations). The HCV areas identified as being included in HCV 6 or areas that have socio-cultural functions are Teu Pek Kong, tombs and also the historical site of Fort Kuto Panji. The HCV locations are within the Perkumpulan Petani Swadaya Bangka Lestari area except for the Benteng Kuto Panji site. Benteng Kuto Panji itself has an area of

about 6.79 ha. The total area of Teu Pek Kong as well as the tomb is about 0.03996 ha.

Based on the explanation above, it can be concluded that Perkumpulan Petani Swadaya Bangka Lestari has a statement of commitment to participate in RSPO certification, one of which is to protect HCV and HCS through a precautionary practice approach.

Where the existing smallholder plot has been planted and cleared after November 2005 or is on an area identified as HCS forests after November 2019 up to the eligibility period, a remediation and compensation process appropriate for smallholders based on Land Use Change Analysis (LUCA) will be applicable (Reference preamble).

Perkumpulan Petani Swadaya Bangka Lestari already has the coordinates of the location of the distribution of members land in the form of a Map of Planted Area PSBL with a scale of 1:228,215 consisting of 208 people with 800 plots of land. This can be made on a map because all members have given the coordinates/locations of their plantation to be mapped to the Group Manager. This was clarified again by the results of interviews with members during field observations at their plot locations and it has been stated that all information related to the location/coordinates of their plantations has been submitted and measured by the Group Manager and the management of the Perkumpulan Petani Swadaya Bangka Lestari.

Smallholders also have a Land Use Change Analysis Report for the Perkumpulan Petani Swadaya Bangka Lestari dated 03 May 2021 which has been submitted to the RSPO secretariat. The result of the report is the total raw non-compliant land clearing (NCLC) is 1206.93 ha and the Final Conservation Liability (FCL) calculated 0.00 ha. Related to remediation area, about 2.90 ha was identified for remediation action as the plots located in the riparian zone and 0.90 ha of oil palm plantation in peatland area. So, the total area that needs remediation is about 3.80 ha within Independent Smallholder in the area..... Considering the above, it concludes that the LUC Analysis of the Perkumpulan Petani Swadaya Bangka Lestari, Indonesia is still passed by the RSPO.

From the table above, it can be concluded that these members have made a statement to commit in writing to participate in RSPO certification. The results of interviews with the nine members revealed that their understanding and commitment to implementing the RSPO P&C for Independent Smallholders was quite good, especially related to no new plantings or expansion of existing plantations in primary forest, HCV areas, HCS forest, riparian areas or steep slopes (more than 25 degrees or as provided for in national interpretations). This is evidenced by the results of interviews with the Group Manager who explained that currently there are no new

planting plans or plans to expand the planting area that will be carried out by the members in 2021 and beyond. The last planting was carried out in 2019 with a total area of 50.51 Ha and in 2020 an area of 12.05 Ha. The plantings in 2019 and 2020 have been confirmed not to be in primary forest areas, HCV areas, HCS forests, river border areas or steep slopes. This is confirmed by the following:

- Overlay between Members Distribution Map and Bangka Belitung Province Forest Area Map (SK-798 of 2012) where there is no members area included in the forest area.
- Slope and Contour Map which states that all members areas are in flat areas and none are in steep areas.
- Overlay between the Members Distribution Map and “Peta Indikatif Penundaan Pemberian Izin Baru (PIPPIB)” in 2021 with a scale of 1:225,000 (Minister of Environment and Forestry Decree No. SK.666/MENLHK-PKTL/IPSDH/PLA.1/2/2021 dated February 15, 2021) which states that no areas with planting years 2019 and 2020 are located in peat areas.

Based on the explanation above, it can be concluded that Perkumpulan Petani Swadaya Bangka Lestari has a statement of commitment to participate in RSPO certification, one of which is to no new plantings or expansion of existing plantations in primary forest, HCV areas, HCS forest, riparian areas or steep slopes (more than 25 degrees or as provided for in national interpretations).

Perkumpulan Petani Swadaya Bangka Lestari (smallholders) have a statement to commit to RSPO certification signed by each member upon joining the group. In the statement of commitment (in Point D Number 14) it is stated that the member of Perkumpulan Petani Swadaya Bangka Lestari is committed to “Use of Good Agriculture Practices (GAP) for oil palm on peat.” Smallholders can show several examples of commitments that have been signed by several members who were interviewed at the time of eligibility assessment as follows:

8	H. M. Syahrani	P00082	11 October 2019
9	Namrul	P00125	04 September 2019

From the table above, it can be concluded that these members have made a statement to commit in writing to participate in RSPO certification. The results of interviews with the nine members revealed that their understanding and commitment to implementing the RSPO P&C for Independent Smallholders was quite good, especially related to implementing Good Agriculture Practices (GAP) in plantation operations. Based on the results of field observations in the nine member plots visited, it is known that there is no peat area and gradually the implementation of Good Agriculture Practices (GAP) has been implemented even though it has not been fully implemented, such as techniques for preparing oil palm releases, using cover crops, and others. so on. The results of interviews with Group Managers revealed that currently there are no oil palm cultivation activities carried out by members who are in peat areas, this has been proven by a survey conducted by Group Managers and administrators in locations previously identified as peat, but from the ground check results which show characteristics such as the absence of slanted palm trees, hard and sandy soil texture. Based on these results, the Perkumpulan Petani Swadaya Bangka Lestari stated that the area does not include peat areas.

Perkumpulan Petani Swadaya Bangka Lestari has done the overlay between the Members Distribution Map and “Peta Indikatif Penundaan Pemberian Izin Baru (PIPPIB)” in 2021 with a scale of 1:225,000 (Minister of Environment and Forestry Decree No. SK.666/MENLHK-PKTL/IPSDH/PLA.1/2/2021 dated February 15, 2021). Based on the results of the overlay (paduseration) it is known that there are indications that there are 2 (two) members plots located in peat areas (Member Plot ID P00137 covering an area of 2.00 Ha and Plot ID P00134 covering an area of 0.99 Ha).

Furthermore, as a follow-up to the results of the harmonious combination, on January 8, 2021, the management of the Perkumpulan

Petani Swadaya Bangka Lestari conducted a ground check to confirm that it was related to indications of the existence of peat areas on Member Plot ID P00137 and Plot ID P00134. From the results of the ground check, the management of the Perkumpulan Petani Swadaya Bangka Lestari stated that neither of the two plots were sandy mineral soils (not peat areas). This is evidenced by the ground check results which show characteristics such as the absence of slanted palm trees, hard and sandy soil texture. However, during the ground check, no soil texture check was carried out to ensure the presence of organic material in accordance with the peat soil classification set by the RSPO.

Based on this explanation, Perkumpulan Petani Swadaya Bangka Lestari has the opportunity to improve the identification/checking of areas indicated by peat in accordance with the peat soil classification established by the RSPO (RSPO Organic and Peat Soil Classification).

- No use of pesticides by farmers or female workers who are pregnant or breastfeeding.

The policy above has been socialized to all members on September 2-7, 2021 and the result is that all members have quite understood this. This is evidenced by the results of interviews that are quite good, the members can explain the procedures for good use of pesticides, storage and other provisions. The members have also stopped using pesticides with the active ingredient paraquat since one to two years ago.

Based on the explanation above, it can be concluded that Perkumpulan Petani Swadaya Bangka Lestari has a statement of commitment to participate in RSPO certification, one of which is to using pesticides in a way that does not endanger the health of workers, families, communities, or the environment.

3.3.2 Opportunity for Improvement

No	Ref. Std.	Description
1	C 2.1	<p>E: A group management plan is available which includes:</p> <ul style="list-style-type: none"> • Training/capacity building plans to improve productivity of group members • An approach to strengthen links within the supply chain • Plan for continuous improvement projects (i.e. on waste, soil, etc.), if any <p>The association has developed a continuous improvement plan as an effort to plan for continuous improvement, such as strengthening understanding related to the RSPO P&C, standardizing the management of chemicals/chemical waste (pesticides and fertilizers), documenting the same operational activities and ensuring the implementation of GAP for all members. The results of document review and interviews during the audit process contain several notes that need more attention from the organization, including but not limited to:</p> <ul style="list-style-type: none"> • Management of pesticide waste generated • Sanitation and land cover in members areas • Documentation / recording of operational records • Uniformity of procedures / governance best practices in agronomic activities including fertilizer dosage, use of chemicals, oil palm upkeep and others

2	2.1	<p>E: Smallholders provide the coordinates or maps of their plots and evidence of ownership or rights to use the land. (Reference indicator 1.1.E, Annex 2)</p> <p>The results of the interview with the Group Manager obtained information that the association had consulted with the relevant agencies regarding the process of managing STDB and SPPL on August 12, 2021, this was also confirmed by the auditor team during a public consultation with the Environment Service and the Food & Agriculture Office of Bangka Regency who explained that the SPPL and STDB process where the process is at the stage of providing the form/blank application for management (SPPL and STDB) along with information related to requirements that must be immediately fulfilled by independent smallholders such as legality documents, plantation distribution maps, and others. The process is considered quite positive by the relevant agencies and hopes to be completed soon so that it can continue at the next stage (verification and field checks before the issuance of SPPL and STDB).</p> <p>Based on the explanation above, associations are encouraged to develop a clear timeline for all members to obtain STDB and SPPL</p>
3	4.4	<p>E: Group manager confirms presence of peat on existing plots within the group and smallholders on peat commit to using best management practices and minimizing subsidence and degradation of peat soils (Reference 1.1 E, Annex 2).</p> <p>Perkumpulan Petani Swadaya Bangka Lestari has done the overlay between the Members Distribution Map and "Peta Indikatif Penundaan Pemberian Izin Baru (PIPPIB)" in 2021 with a scale of 1:225,000 (Minister of Environment and Forestry Decree No. SK.666/MENLHK-PKTL/IPSDH/PLA.1/2/2021 dated February 15, 2021). Based on the results of the overlay (paduseration) it is known that there are indications that there are 2 (two) members plots located in peat areas (Member Plot ID P00137 covering an area of 2.00 Ha and Plot ID P00134 covering an area of 0.99 Ha).</p> <p>Furthermore, as a follow-up to the results of the harmonious combination, on January 8, 2021, the management of the Perkumpulan Petani Swadaya Bangka Lestari conducted a ground check to confirm that it was related to indications of the existence of peat areas on Member Plot ID P00137 and Plot ID P00134. From the results of the ground check, the management of the Perkumpulan Petani Swadaya Bangka Lestari stated that neither of the two plots were sandy mineral soils (not peat areas). This is evidenced by the ground check results which show characteristics such as the absence of slanted palm trees, hard and sandy soil texture. However, during the ground check, no soil texture check was carried out to ensure the presence of organic material in accordance with the peat soil classification set by the RSPO.</p> <p>Based on this explanation, Perkumpulan Petani Swadaya Bangka Lestari has the opportunity to improve the identification/checking of areas indicated by peat in accordance with the peat soil classification established by the RSPO (RSPO Organic and Peat Soil Classification).</p>

3.3.3 Noteworthy Positive Components

No	Description
